INTRODUCTION

One simple question answered for our entire journey.
Cryptocurrency project that is 100% run by the community itself, what will happen ?

Our founder, Keilvin Devin said this from the very beginning of the project, "**Before building the decentralized spontaneous community we experimented** "

While the term DeFi literally includes the word decentralized, this is in reference to economic status as opposed to its internal hierarchy

While none of us could have imagined it at the time, this was a concept that would start a revolution.

Projects built on the foundation of community involvement are the untamed wilderness of our future. As we move further away from rigid financial structures and traditional mindsets, we become free to discover new ways to solve problems and relate to one another.

In a world ruled by the commodification of time, community-run projects are more than just a change of pace, they are a way to practice the radical acceptance of others.

When success depends on the shared strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us.

The Zorotoken Ecosystem

The Zorotoken Ecosystem is our way of recognizing the importance of tearing down this long-established paradigm.

A community is held together by hundreds, if not thousands, of interconnected moments. By studying those drawn to our project, we realized that true strength doesn't come from one of us alone, it comes from when we work together in harmony.

With that thought bright in our minds, we began developing the Zorotoken Ecosystem in earnest.

WHY DECENTRALIZATION?

We are standing at a pivotal moment in innovation.

Until now, centralization has been a prerequisite for all of our official structures. Political, educational, and financial systems are, and have always been, crafted in a way that does not equally and ethically distribute power to those functioning within them. There have been times in our history where this sort of internal structure played an important role, but in an age with the information of the world available at the click of a button, it's time to rethink.

2021 opened our eyes to how little control the average person has in the face of these overarching, generational structures when GameStop and AMC stock value exploded seemingly overnight. WallStreetBets tested the waters of what it would look like to disperse control to consumers and inexperienced investors alike.

WHY DECENTRALIZATION?

It was inspiring, but it didn't last long. Just when the movement seemed to be on the brink of success, it was throttled by the bureaucracy of our centralized society. However, not before this concept of a new power among the people took root.

Months before any of these events made international news, Keilvin Devin was already setting his 100% community-based, cryptocurrency experiment into motion.

Cryptocurrency itself comes from the idea of redefining wealth and how it can be acquired, which goes against traditional processes by its very nature. And yet, most, if not all, cryptocurrencies function within enforceable rules. It's easy to see when we look back at cases like the SEC's win over the Kin Ecosystem (a centralized authority), or when we consider how the Binance Smart Chain seems to use centralized authority to offer "benefits" over their decentralized partnerships.

In the ever-shifting economic landscape, cryptocurrencies which do not take their independence into their own hands struggle with a tenuous existence.

When the rules of the game are changed against their favor, they have no option but to comply; regardless of the consequences.

In the ever-shifting economic landscape, cryptocurrencies which do not take their independence into their own hands struggle with a tenuous existence.

When the rules of the game are changed against their favor, they have no option but to comply; regardless of the consequences.

OUR BACKGROUND

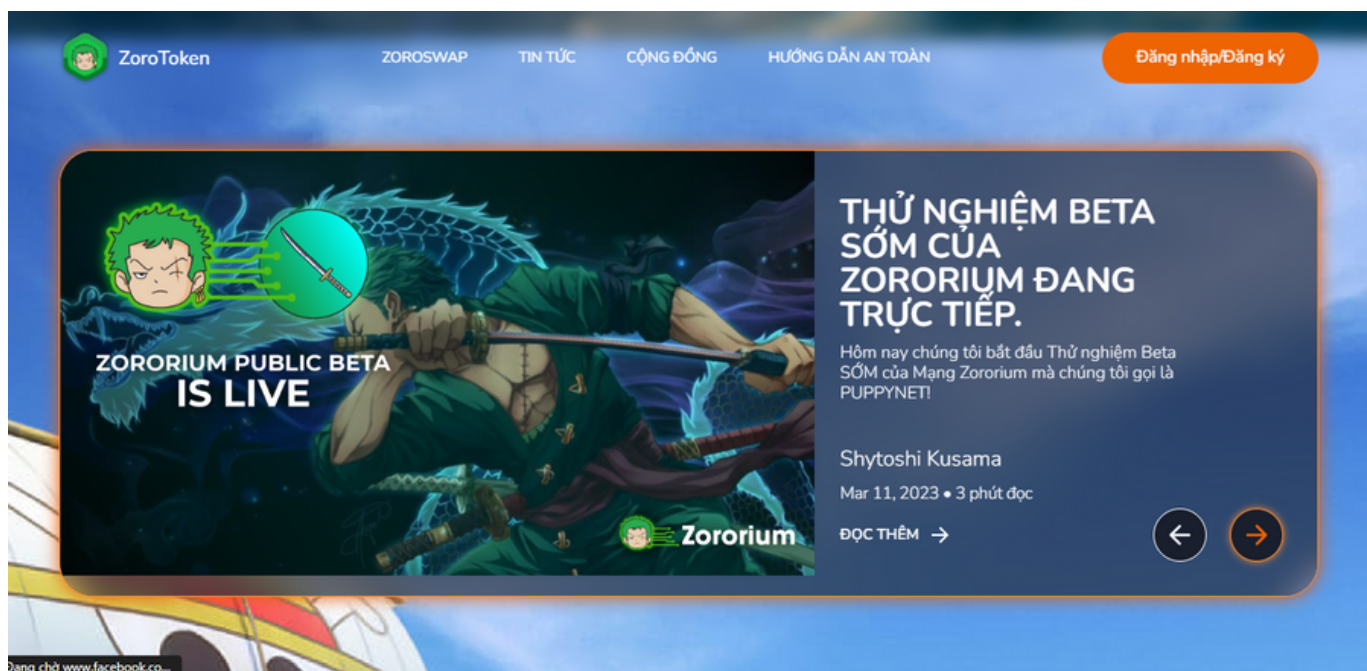

Keilvin Devin approached the creation of our community from a unique perspective.

“We believe through the power of collective decentralization we can build something stronger than a centralized team ever could create. A community-run token is nothing without the united individuals who give it purpose.”

From the early days of Zorotoken, we became known as the Zoro Army, both amongst ourselves and across the countless other platforms. This wasn't just a name. For many it became part of their username, their handle, and their avatars/profile pictures which they switched to our adorable Zorotoken sporting a beret.

Whether you are a new recruit or part of the old guard, if you fly under the Zoro banner, you must embrace our founding principles:

1. We started from zero, with zero. It's the spirit of our project to create something out of nothing.
2. We were not founded from an existing community, let alone a preassembled team. The brilliant minds behind Zoro had never collaborated before. They were a fresh team of developers, designers, moderators, marketers, and shillers. When you joined the Zoro army, from anywhere in the world, you found where your talents could be used best, and got to work.

3. We love Zorotoken

We are proud of where the Zoro Army originated and equally excited for our future. Our founder Keilvin Devin , chose to start Zoro from nothing, and gave the direction of the currency to our army (which rapidly grew to be over 120,000+ members strong).

Starting with nothing means everyone has to bring something to the table.

The holders and believers in our Zoro Army have been the source of all our success.

You and more than 120,000 fellow holders, admins, mods, leaders of international chat rooms, social media influencers, meme makers, shillers, and most of all, friends.

THANK YOU. You are the real Zorotoken, and we salute you.

"To know ten thousand things, know one well"
- Miyamoto Musashi

When comparing different blockchains, you might wonder why we chose to stay on the ETH network. The answer, like the rest of our project, is straightforward and purposeful.

Our founder, Keilvin Devin, embarked on the Zoro journey with a predisposition towards ETH in the first place. It's already secure and well-established, and it truly allows us to stay decentralized (unlike some of the "fad" networks).

His top priority was to ensure that his project was free to change and evolve with zero outside regulations impacting it, and ETH was the way to achieve that goal. Our army is able to hold their own tokens in a wallet and collect payments from around the world, all while remaining independent of moderating forces.

Our founder also chose to send 50% of the total supply to Vitalik Buterin's wallet because, in his words, "We sent over 50% of the TOTAL supply to Vitalik. There is no greatness without a vulnerable point and as long as VB doesn't rug us, then Zoro will grow and survive."

These aspects of ETH are what made it the perfect foundation for ShibaSwap, a truly decentralized exchange where you can trade, buy, sell, and HODL to gain rewards which far outstrip the value of other staking platforms.

As ETH v.2 gets closer every day, bringing faster and cheaper transactions with it, ZoroSwap is poised to become the most popular and highest volume exchange with a laser focus on Erc-20 tokens and the Ethereum blockchain.

ZORORIUM ROADMAP COIN UP TREND ?

In the context of constantly evolving technological advancements, Zororium emerges as a breakthrough application powered by Blockchain & AI platform ChatGPT-4 invested by billionaire Elon Musk, the latest version of the model. famous AI language. Zororium is proud to be the first Games and Anime creator and creator app in Southeast Asia, revolutionizing the way content creators interact with AI technology. With out-of-the-box features and huge potential, Zororium is set to redefine the digital experience. Join us to explore the Zororium Roadmap and its milestones.

Zororium paved the way for the emergence of digital assets, changing the way content is created, managed, and monetized. By leveraging Blockchain technology, Zororium enables the creation of unique digital assets.

Community Initiative The Zoro Token (ZoroArmy)

Community initiative started from a handful to a record of millions of supporters worldwide. From an individual or network of individuals dedicated to demonstrating the energy, ecosystem and power of cryptocurrencies, with a particular focus on the utility functions of the Zoro Ecosystem and the growth factor in the space DeFi.

With that said, the health and happiness of the project is always community.

We like to reward the community's creators with care and support, but always understand that each project has its own merits and remind all community members to do their research before participating. engage in any valuable community engagement. We are proud to see Zoro Token grow, as a community, to be decentralized and efficient.

Zoro Sanda

ZOROSANDAI is 200,000 Non-Fungible Instances (NFTS) created by Zoro Token and recorded on the ChatGPT-4 blockchain forever. The launch of ZOROSANDAI made the ChatGPT-4 blockchain stand out, skyrocketing gas prices during the release and sold out within 15 minutes!

These amazing Zorosandai are equipped with different characteristics, making each version unique and valuable for collection. For example laser eyes or party hats. No two Zorosandai are alike. Zorosandai is Zoroswap's original and unique NFT collection.

Zoro Eternity game, part of the Zoroswap system, has been released on both the Apple App Store and Google Play Store to showcase an energetic Zoroswap world, while in the future blockchain version, the owner of Zorosandai is said to be the owner of Zorosandai. have the ability to use your NFT in strategy games and much more.

As the Zororium ecosystem continues to grow, it promises to offer upcoming gadgets to those who hold them as keepsakes or collectibles.

Zoro Eternity™

Zoro Eternity is a role-playing game created by Onepiece Studios under the direction of Toei Animation and under the creative direction of Oda Eiichiro. Zoro Eternity plunges you straight into the exciting world of Onepiece; world where famous pirates are ruled by four emperors, fighting against the navy.

With over 1000 unique items to collect and 10,000 powerful pirates with different powers, Zoro Eternity allows you to develop your own Devil Fruit powers based on the characteristics of Anime Onepieces, and has 4 main strengths. to develop!

1. Mastering Haki

2. Paramecia Devil Fruit

3. Zoan Devil Fruit

4. Logia Devil Fruit

How will you attack the enemy? A trick way? Patient? Beat them by sheer force or perhaps by overwhelming numbers? The choice is entirely up to you.

Available on Android and iOS. Enter the world of Onepiece today!
